

QA TEST REPORT

TEMPLATE

Use this template for either final project. Fill in only the sections relevant to your testing.

Student Name	Rand Abhari
Project Name	Training Center Management System

1. Project Overview

The Training Center Management System is a full-stack web application for managing students, instructors, courses, and enrollments. The system provides CRUD operations, search and filtering, course enrollment management, authentication using JWT, form validation, and protected data-changing operations. The main features tested were student, instructor, course, enrollment, login, registration, validation, authorization, and error handling.

2. Testing Environment

Backend	ASP.NET Core	Frontend	Angular
Database	PostgreSQL	API Tool	Postman
Browser	Microsoft Edge	Environment	Local Development

3. Test Cases

Record each test before execution, then complete Actual Result and Status after testing.

TC ID	Feature	Test Scenario	Test Data	Expected Result	Actual Result	Status
TC-STU-01	Search (Student)	[Search for the student by name]	Name : Rand	200 OK	200 OK	Pass
TC-STU-02	Filter (Student)	[I filtered the students by major]	Major: VR	200 OK	200 OK	Pass
TC-STU-03	Create (student)	[Create a student with valid data and without token]	[name: Ahmad Omar, Email: ahmad234@gmail.com , Age : 20, Major: VR, Phone : 078646242]	401 Unauthorized	401 Unauthorized	Pass
TC-STU-04	Create (student)	[Create a student with valid data and with token]	[name: Omar Ibrahim, Email: Omar78Ibrahim@gmail.com , Age : 18, Major: AI, Phone : 078676278]	201 Created	201 Created	pass
TC-STU-05	Update (Student)	[Update a student with valid data and without token]	[name: Omar Ibrahim, Email: Omar78Ibrahim@gmail.com , Age : 23, Major: IT, Phone : 078676278]	401 Unauthorized	401 Unauthorized	pass
TC-STU-06	Update (Student)	[Update a student with valid data and with token]	[name: Omar Ibrahim, Email: Omar78Ibrahim@gmail.com , Age : 23, Major: IT, Phone : 078676278]	204 No Content	204 No Content	Pass
TC-STU-07	Delete (Student)	[Delete a student with valid data and without token]	Student Id: 2	401 Unauthorized	401 Unauthorized	pass

TC-INS-8	Create (instructor)	[Create a instructor with valid data and without token]	{ "Name" : "Omar" , "Email": "Omor34Qe@gmail.com", "S": "BackEnd Developer"}	401 Unauthorized	401 Unauthorized	pass
TC-COU-9	Create (Course)	[Create a course with valid data and with token]	{ "Title" : "Mobile Development ", "Description" : "He builds cross-platform applications using technologies such as Flutter or React Native.", "Capacity": 35, "startDate": "2026-09-01T09:00:00Z", "endDate": "2026-10-20T17:00:00Z"}	201 Created	201 Created	pass
TC-ENR-10	Cancel (Enrollment)	[Cancel a enrollment with token]	Enrollment Id: 2	200 OK	200 OK	pass
TC-AUTH-11	Authorization	Verify that an invalid JWT token is rejected	Invalid / fake JWT token	401 Unauthorized	401 Unauthorized	Pass
TC-12	Login	Login with valid credentials	[Email: randaur67i@gmail.com , Password: 123456uu]	200 OK and JWT token is returned	200 OK and JWT token was returned	Pass
TC-13	Register	Register a new user with valid data	[Email: randaur67i@gmail.com , Password: 123456uu]	201 Created	201 Created	Pass

Tip: Write the Expected Result before running the test.

4. Bug Reports

Create a bug report only when a test fails because the actual behavior does not match the requirement.

BUG-01

Title	Data was not displayed in the list after loading from the API	Severity	Medium
Environment	Angular- Local Development - Microsoft Edge	Status	Closed
Steps to Reproduce	1. Open the main pages 2. Load the data from API 3. Observe the list on the page 4. The API returns the data but the list remains empty		
Expected Result	The retrieved data should be displayed in the list		
Actual Result / Evidence	The API request returned the data successfully but the data was not displayed in the UI During the initial implementation .The issue was fixed by updating the list state to use Angular signal		

BUG-02

Title		Severity	
Environment		Status	
Steps to Reproduce			
Expected Result			

5. Test Execution Summary

TOTAL TEST CASES [
 13]

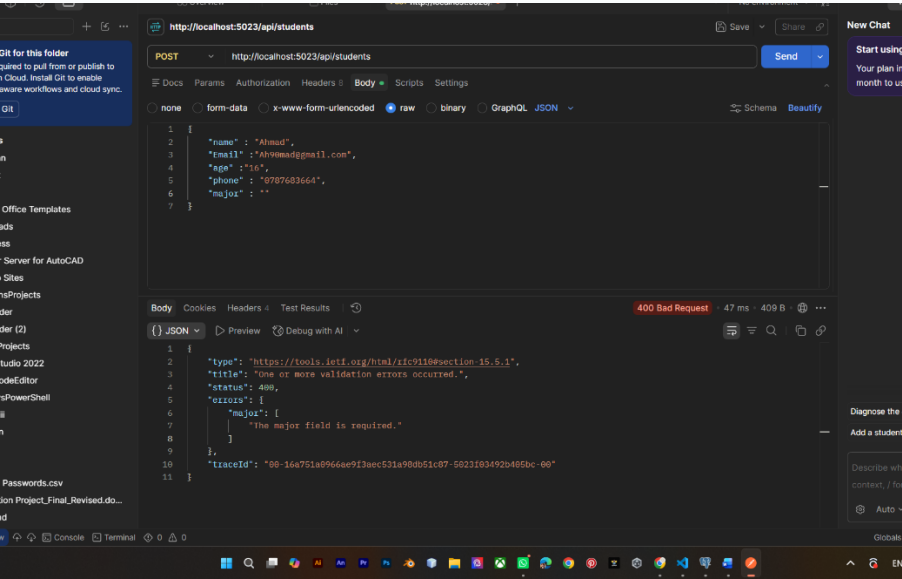

PASSED [
 13]

FAILED [
]

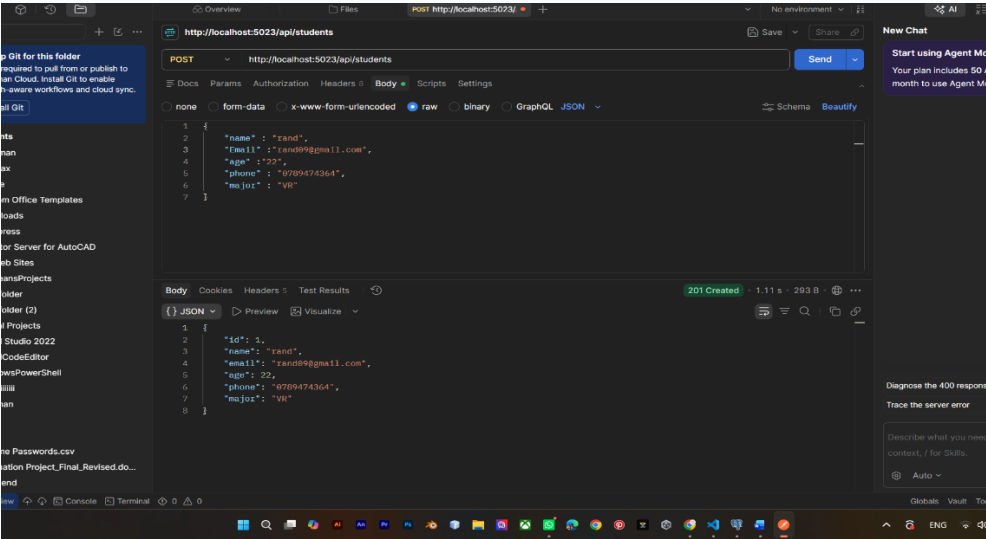

6. Evidence / Screenshots

Add a few clear screenshots from Postman or the application. Each screenshot should show what was tested and the result.

Screenshot 2

Screenshot 3

Screenshot 4

7. Conclusion

Write a short final summary of the testing result, including whether the main project features passed and whether any issues remain open.

Testing of the training center management system has been successfully completed. All planned test cases were executed successfully, including tests for student, instructor, and course data management, as well as registration processes, authentication, authorization, data validation, and business rules. The application met key functional requirements and performed as expected across all tested scenarios.
